Why Should YOU Make the Switch to Propane?

- GREEN
- Cost Savings
- Cleaner Burning
- Energy Independence

ADVANTAGE AutoGas will:

- Determine the appropriate tank size based on your fleet and fuel use.
- Design your installation according to local code requirements.
- Coordinate and apply for all applicable permits for installation and operation.
- Identify the most appropriate tank / fueling station site that fits your needs.
- Order the appropriate AutoGas refueling station equipment for your fleet.
- Work with and coordinate with your electrician for power needs.
- Communicate clearly to you and your staff throughout the installation process.
- Oversee the installation, testing, and final inspection of your **ADVANTAGE AutoGas** refueling station.
- Provide training for the safe operation of the AutoGas refueling station for all your drivers and operations personnel.
- Provide you with documentation detailing all aspects of training programs.

ADVANTAGE AutoGas™:

Installing your propane fueling system

ADVANTAGE AutoGas makes the installation process of your fleet's propane refueling station simple and straightforward.

ADVANTAGE AutoGas designs and installs your propane fueling system and we manage the process from start to finish.

ADVANTAGE AutoGas can have your refueling station installed in a matter of weeks once you commit to join our program. As soon as your vehicles are converted you will be burning clean, economical propane AutoGas.

ADVANTAGE AutoGas refueling station is a relatively simple system. Depending upon your need, most **ADVANTAGE AutoGas** refueling stations consist of a self-contained single above-ground storage tank and a dispenser with a meter for tracking usage. It can look like a traditional gasoline pump or come with just a basic hose and nozzle enclosed in a tamper-proof cabinet.

Propane Fueling Infrastructure

Skid Mounted Economy Dispenser

- Small, fleet, fixed-base operation
- Simple dispenser on tank skid or horizontal supply tank
- Single or two-vehicle refueling
- Meter reading on dispenser only
- Ease of installation / ability to relocate if the business moves
- Meets all necessary federal, state and local codes

Skid Mounted Electronic Dispenser

- All the same benefits of the Economy Unit Plus
- Plus:
 - One or two hose option
 - Electronic calibration
 - Electronic totalizer
 - Integrated communications for 3rd party fuel management systems
 - Wireless data collection

Service Station Island Dispenser

- Single or two-vehicle refueling
- Compatible with most major fuel reading systems (Veederroot, OPW)
- Credit, debit, fleet supplier card reader and interactive keypad
- Data transfer via the internet
- Single or multiple remotely located dispensers supplied by one or more supply tanks
